For effective instruction at all levels (K-16), for differentiated instruction, for RTI, and for making AYP in No Child Left Behind, this course will provide ground-breaking tools and research for teachers and counselors alike. A growing body of research suggests that one way to reach and teach all students is to consider the gender differences in terms of brain-wiring, learning styles, and motivation. This class will explore the research and provide participants with more than two dozen strategies to reach and teach based on the needs and styles of both genders.
