(There is no admission fee for
Quincy University.)

This course addresses tools for all educators, K-college. Whether addressing STEM issues, RTI, Race to the Top, or CTE initiatives, education research suggests that to be truly effective and internalized, learning must occur on both a cognitive and a personalized, interactive level. Students must "do something" with information to make it their own and to form effective neural pathways of learning in the brain. This course will offer participants more than 25 different teaching strategies to achieve this goal. These strategies can be used in a variety of disciplines and grade levels. All strategies involve higher order thinking and hands-on learning. Participants will present lessons based upon these strategies and provide participants with a variety of tools for effective and interactive classroom learning.

*Please purchase and bring the textbook, *Teach Like a Champion: 49 Techniques that Put Students on the Path to College*, by Doug Lemov and Norman Atkins, 2010 (ISBN-10: 0470550473, ISBN-13: 9780470550472), to the first class session. (Available at amazon.com and Barnes & Noble, order early!)
